

Filtermist Limited – REACH Policy Statement

Purpose

Filtermist Limited is committed to ensuring full compliance with the requirements of the **UK REACH Regulation (Registration, Evaluation, Authorisation and Restriction of Chemicals)** and, where applicable, **EU REACH**, to protect human health, the environment, and the integrity of our products and supply chain.

Scope

This policy applies to all Filtermist operations, including:

- Manufacturing and assembly activities
- Procurement and supply chain management
- Use of chemical substances and mixtures
- Supply of finished products (articles), components, and associated consumables

Policy Statement

Filtermist recognises its responsibilities under REACH as a **downstream user, importer (where applicable), and supplier of articles and mixtures**. We are committed to:

- Ensure that all substances and mixtures used in our operations are handled in accordance with applicable Safety Data Sheets (SDS) and regulatory requirements
- Maintain active communication with suppliers to ensure REACH compliance, including registration status where applicable
- Monitor and manage Substances of Very High Concern (SVHC) in line with regulatory thresholds and customer requirements
- Communicate relevant REACH information to customers where required
- Review our obligations regularly to reflect changes in legislation, supply chain status, or business activities

Where Filtermist acts as an importer or where REACH obligations extend beyond downstream user responsibilities, we will ensure full compliance with all applicable registration and reporting requirements.

This approach supports our commitment to legal compliance, environmental responsibility, and the protection of human health.

Signed:

Operations director.
